

2012 Alumni Employment Outcomes

The information shared is self-reported data collected between September 2013 and November 2013 via a survey e-mailed to 1,059 alumni of The Chicago School of Professional Psychology (TCSPP). All data shared are based on survey respondents who graduated from any TCSPP campus (unless otherwise indicated) during the 2011 – 2012 academic year only. The data below is derived from the data received in response to September 2013 and November 2013 surveys, as shown in the response rates below.

This information is intended to serve as a sample of the types of positions and employers in which graduates of the program work. It in no way guarantees that future graduates will secure employment with the employer or in the job titles listed. In particular, it is important to note that some job titles require state-specific licensure. When considering enrollment in a particular program offered by The Chicago School of Professional Psychology, students are expected to be aware of whether their program of interest is licensure eligible and, if so, the licensing requirements in the state in which they intend to work.
