

Alumni Employment Outcomes

Academic Year 2020—2021

Introduction

The information presented in this disclosure is intended to function only as a sample of the types of employment in which graduates of The Chicago School of Professional Psychology (TCSPP) work. It in no way guarantees that future graduates will secure employment with either the employers or in the job titles listed. Also, it is important to note that some job titles require state-specific licensure. When considering enrollment in a program offered by TCSPP, students are expected to be aware of whether their program of interest is eligible for licensure and the licensing requirements in the state in which they plan to work.

Methodology

The Office of Institutional Research (OIR) surveyed TCSPP alumni who graduated in academic year 2020 – 2021 (AY 20–21)¹ using a web-based questionnaire. Using TCSPP’s alumni database, OIR identified 1,391 TCSPP alumni with a valid email address who graduated in AY 20 – 21 from a TCSPP campus. Contact information for the sample was provided by TCSPP’s alumni database. The survey was available from 07/12/22 to 08/20/22. The response rate for the survey is 13.7%² (n=191) with a margin of error of ±6.6%.³ To increase response rates, OIR first contacted individuals using an introductory email on 06/22/21 with subsequent reminder emails. The total number of possible contacts attempted by OIR was five.

Please note that this disclosure only includes information from academic programs that had five or more survey responses to the following survey item: *Are you currently employed?*⁴ The results presented in the following disclosure are based on survey responses from AY 20 – 21 graduates responding to this survey whose programs have at least 5 qualified respondents (n=103).

¹ The sample was pulled using TCSPP’s alumni database, Raiser’s Edge and CVue. All individuals within the sample have a conferred graduation date ranging from 09/15/20 to 08/31/21 and a valid email address.

² Response rate and cooperation rate was calculated in guidelines with AAPOR standards.

³ The margin of error for the AY 20 – 21 was calculated using the following formula: $E = \frac{Z_{\alpha/2}}{(2*\sqrt{n})}$, where $Z_{\alpha/2} = 1.96$ and n is the number of respondents who completed the survey (n=191).

⁴ This document relies on self-reported employment survey data for academic programs.
